📍 Syria, Tartous.

🌐 [linkedin.com/in/kamal-jamous](https://www.linkedin.com/in/kamal-jamous)

Results-driven Full-Stack Laravel Developer with hands-on experience building scalable, high-performance web applications and Single Page Applications (SPAs). Proficient in the TALL stack, React.js, Inertia.js, and RESTful API development. Adept at database architecture (MySQL), performance optimization, and leveraging AI-assisted workflows to accelerate development cycles and elevate code quality. Proven ability to architect modular solutions, streamline backend operations, and deliver seamless user experiences.

## WORK EXPERIENCE

---

01/2025 – Present  
Syria, Tartous

### Freelance

*Freelance*

- Architected and deployed full-stack web applications for diverse clients using Laravel, React.js, and Inertia.js, ensuring high performance and scalability.
- Implemented modern Laravel ecosystem tools, including Filament PHP, to build dynamic admin panels and streamline content management processes.
- Optimized database queries and RESTful APIs, reducing page load times and improving overall application responsiveness.

07/2024 – 11/2024  
UAE, Sharjah

### ProKoders

*Laravel Developer Intern*

- Designed and developed scalable RESTful web services using Laravel, ensuring seamless frontend-backend integration and secure data flow.
- Built and optimized interactive user interfaces utilizing HTML5, CSS3, and JavaScript, ensuring cross-browser compatibility and responsive design.
- Collaborated in an Agile team environment to test, debug, and resolve technical issues, significantly improving system stability and end-user experience.

## EDUCATION

---

Class of 2026  
Syria, Tartous

### Syrian Virtual University (SVU)

*Bachelor of Information Technology Engineering (ITE)*

## TECHNICAL SKILLS

---

### Backend & Database

PHP, Laravel Framework, MySQL, Filament, RESTful API Development, Database Design & Optimization, Eloquent ORM, Authentication & Authorization (RBAC).

### DevOps

Docker, CI/CD Pipelines, Git, Composer, Linux Basics, Postman.

### Frontend

React.js, Inertia.js, JavaScript, Tailwind CSS, Bootstrap, HTML5, CSS3, Responsive Web Design.

### Core Competencies

Problem Solving, Agile/Scrum Collaboration, AI-Assisted Development, Web Performance Tuning, Secure Coding Standards, SEO Best Practices.

## LANGUAGES

---

**Arabic** — Native/Bilingual

**English** — Conversational

**German** — Basic A1

## PROJECTS

---

### Learning Management System (LMS)

- Developed a comprehensive full-stack LMS using Laravel, and React Inertia.js, featuring a Single Page Application (SPA) experience.
- Implemented secure Authentication and Role-Based Access Control (RBAC) to manage permissions across administrators, instructors, and students.
- Built advanced educational modules including quizzes, exams, assignment tracking, and real-time chat for online lectures.
- Designed dynamic user profiles with visual progress tracking and an integrated job posting system, utilizing reusable React components for code maintainability.

### E-Commerce Platform

- Developed a high-performance, multi-lingual e-commerce platform using Laravel, Livewire, tailwind, and Alpine.js, delivering a seamless Single Page Application (SPA) experience with a "Minimalist Luxury" UI/UX.
- Engineered a frictionless One-Page Checkout and a Hybrid Database Cart system, featuring intelligent guest-to-user cart merging and secure payment gateway integrations (Stripe, PayPal).
- Architected a dynamic, modular CMS using Filament PHP, empowering administrators with a comprehensive block-based builder for the homepage, advanced product variants, and dynamic menus.
- Implemented robust backend services including transaction-safe inventory management, real-time advanced filtering, and a comprehensive customer dashboard equipped with OpenStreetMap reverse geocoding.

### Real Estate Management Dashboard

- Developed a full-featured Real Estate System using Laravel and Filament, delivering a modern and responsive admin dashboard.
- Engineered a scalable content management module for creating property listings, categorizing articles, and implementing a dynamic tagging system.
- Integrated Role-Based Access Control (RBAC) to securely manage user permissions and administrative hierarchies.
- Designed a modular and SEO-friendly architecture, ensuring high performance and easy future feature expansion.

### Hospital Management System With Laravel API

- Developed a robust backend system to streamline hospital operations, managing complex relationships between departments, doctors, and patient services.
- Implemented dynamic resource tracking logic for rooms and departments, monitoring real-time status (occupied, vacant, maintenance) to optimize patient allocation.
- Built an advanced scheduling engine for doctor shifts and surgical operations, ensuring precise medical team allocation based on specialties.
- Orchestrated the full patient lifecycle (admission to discharge) and managed ancillary medical services including imaging and laboratory tests.

### Heart Attack Prediction Dashboard

- Developed a secure medical analysis dashboard using Laravel and Inertia.js, facilitating heart attack risk prediction based on patient lab data.
- Integrated an external AI-powered API (LLM) for real-time health analysis, seamlessly connecting the backend with the prediction engine.
- Enforced strict data privacy and security protocols, ensuring authenticated users have isolated access exclusively to their personal medical records.
- Architected and implemented the complete Full-Stack solution, translating complex medical data inputs into user-friendly historical visualizations.
